

Installing C software:

open a browser.

Type turbo c++ by akki

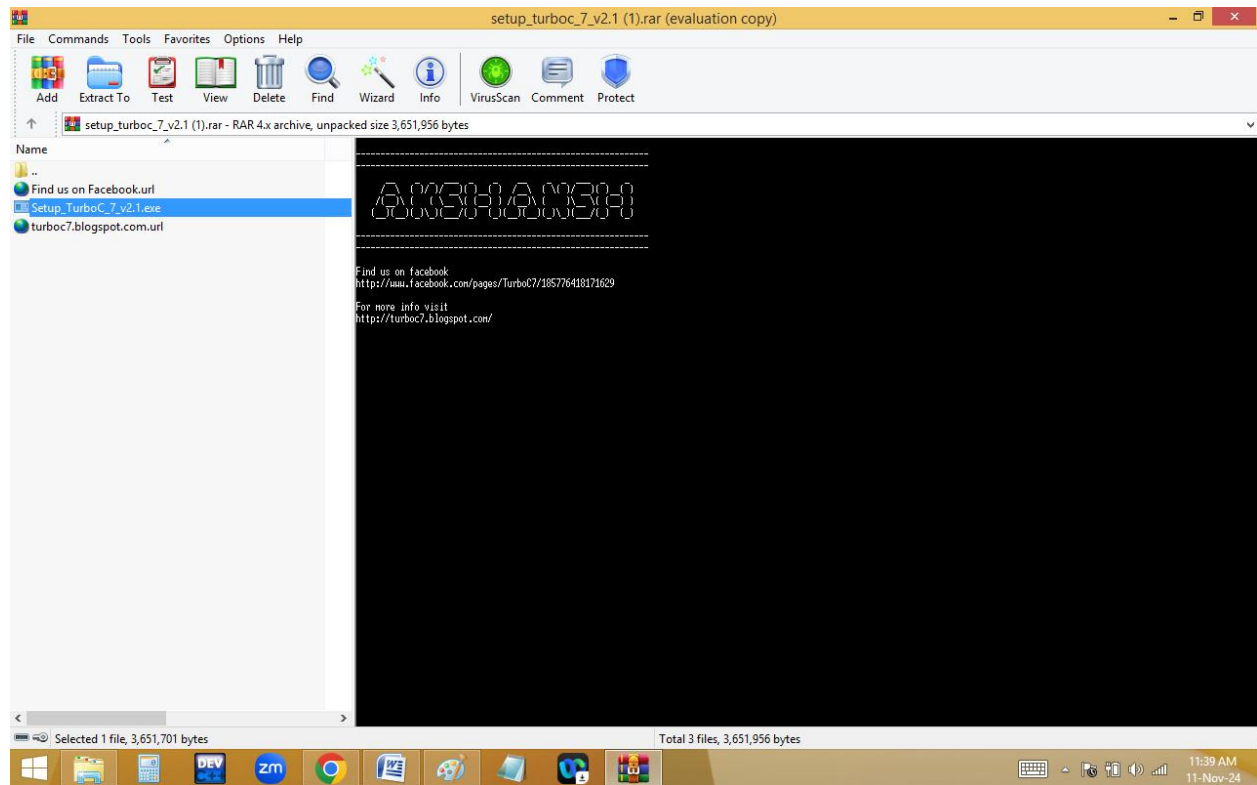

Click on download turbo c 7 by akki

Or click on below link

<https://turboc-7-by-akki.software.informer.com/download/download> any unzip software like winrar / 7zip / unzip etc.

click on [setup_turboc_7_v2.1\(10\).rar](#)

now the window is displayed as follows.

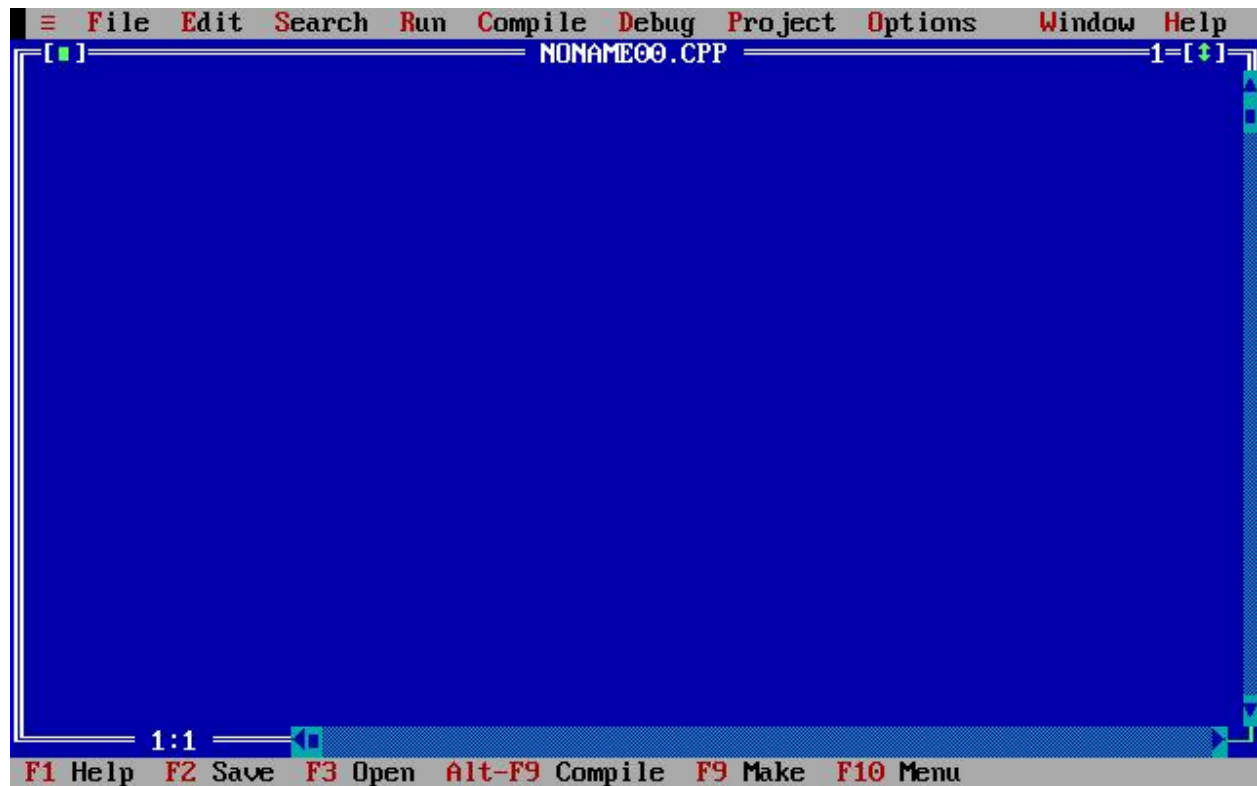

Double click on Setup_TurboC_7_v2.1.exe

Click on yes ➡ next ➡ next ➡ next ➡ next ➡

Install ➡ finish

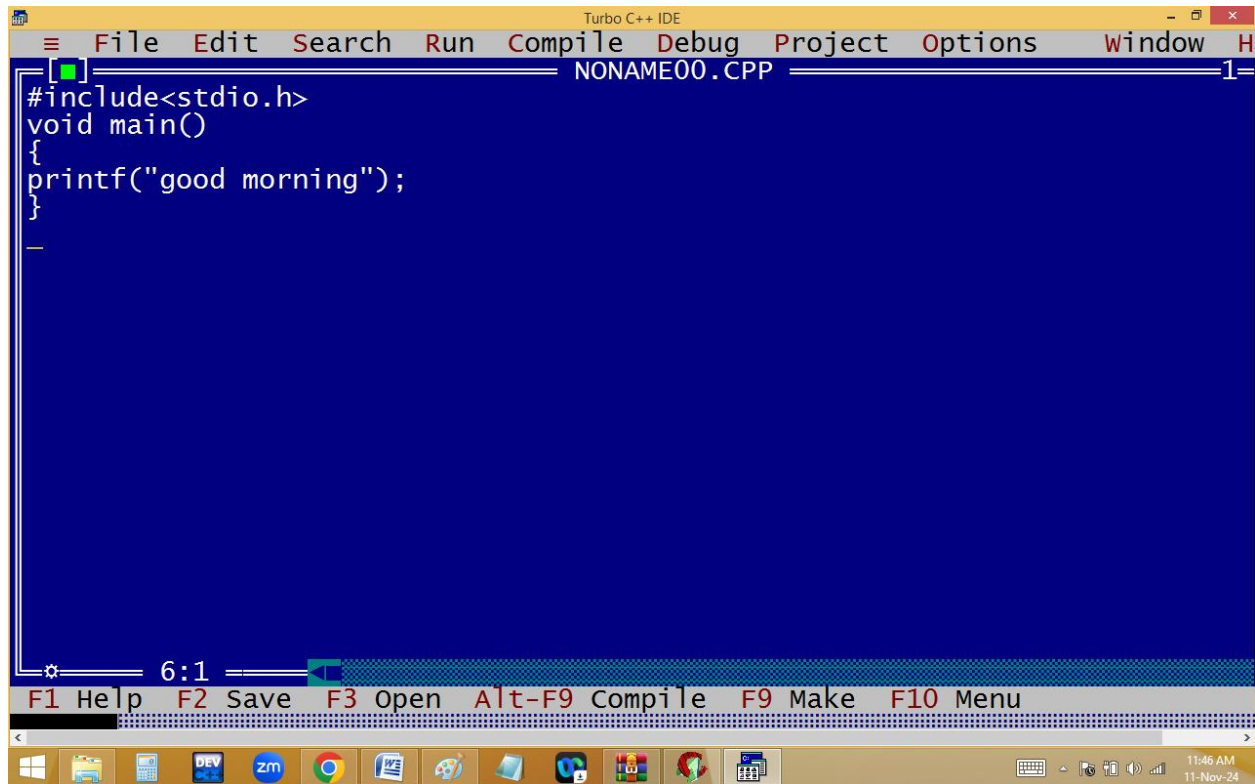

Now it shows a blue color window which is called

IDE – INTEGRATED DEVELOPMENT ENVIRONMENT V/
BLUE SCREEN / EDITOR

To get full / half screen press alt+enter key

Sample program:

The image shows a screenshot of the Turbo C++ IDE. The title bar reads "Turbo C++ IDE". The menu bar includes "File", "Edit", "Search", "Run", "Compile", "Debug", "Project", "Options", "Window", and "Help". The current file is "NONAME00.CPP" at line 1. The code in the editor is:

```
#include<stdio.h>
void main()
{
printf("good morning");
}
—
```

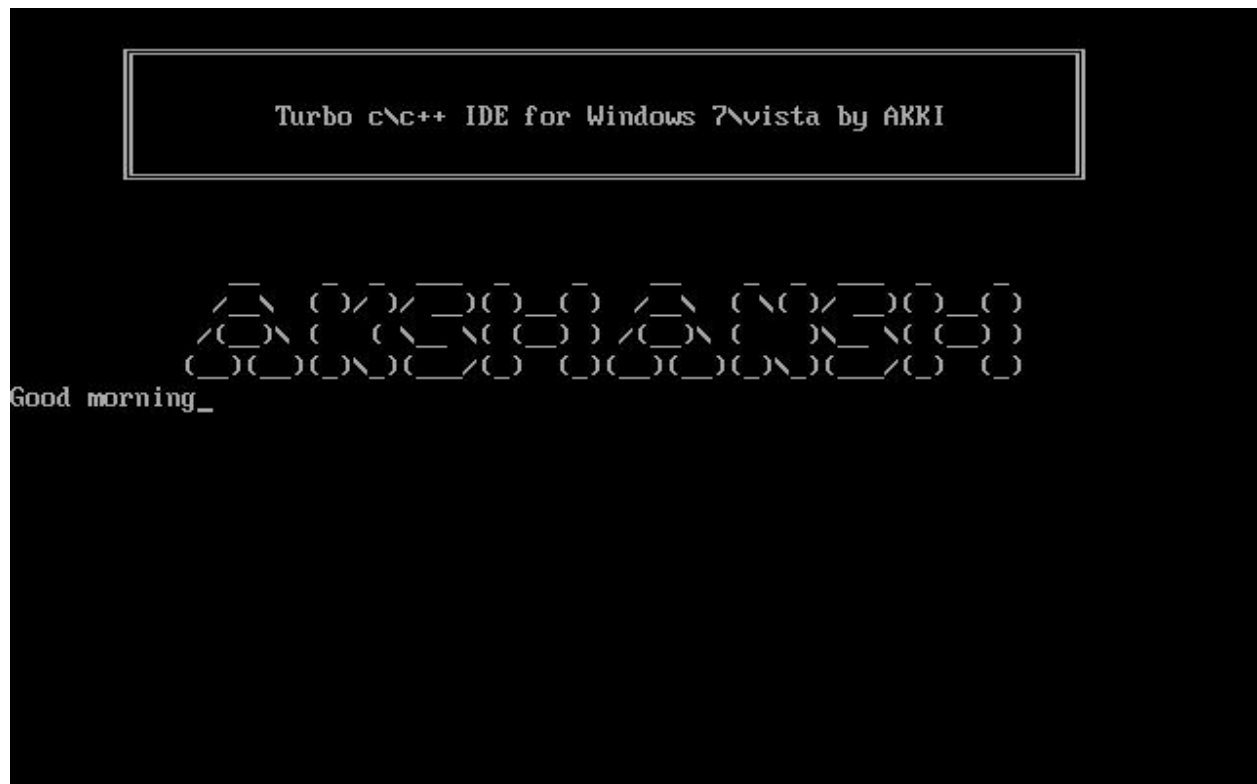

The status bar at the bottom of the editor shows "6:1". Below the editor, a toolbar contains the following shortcuts: "F1 Help", "F2 Save", "F3 Open", "Alt-F9 Compile", "F9 Make", and "F10 Menu". The Windows taskbar is visible at the bottom with various application icons and a system clock showing "11:46 AM 11-Nov-24".

Save the program – Press F2 button [Fn + F2] or alt+f and select save

Compile the program - Alt+F9 or Alt+C and select compile

Run the program – Ctrl+F9 or Alt+R and select Run

For Output - Alt+F5 or Alt+W and select user screen

This black window is called
Command prompt / console / run window / user screen
/ output window

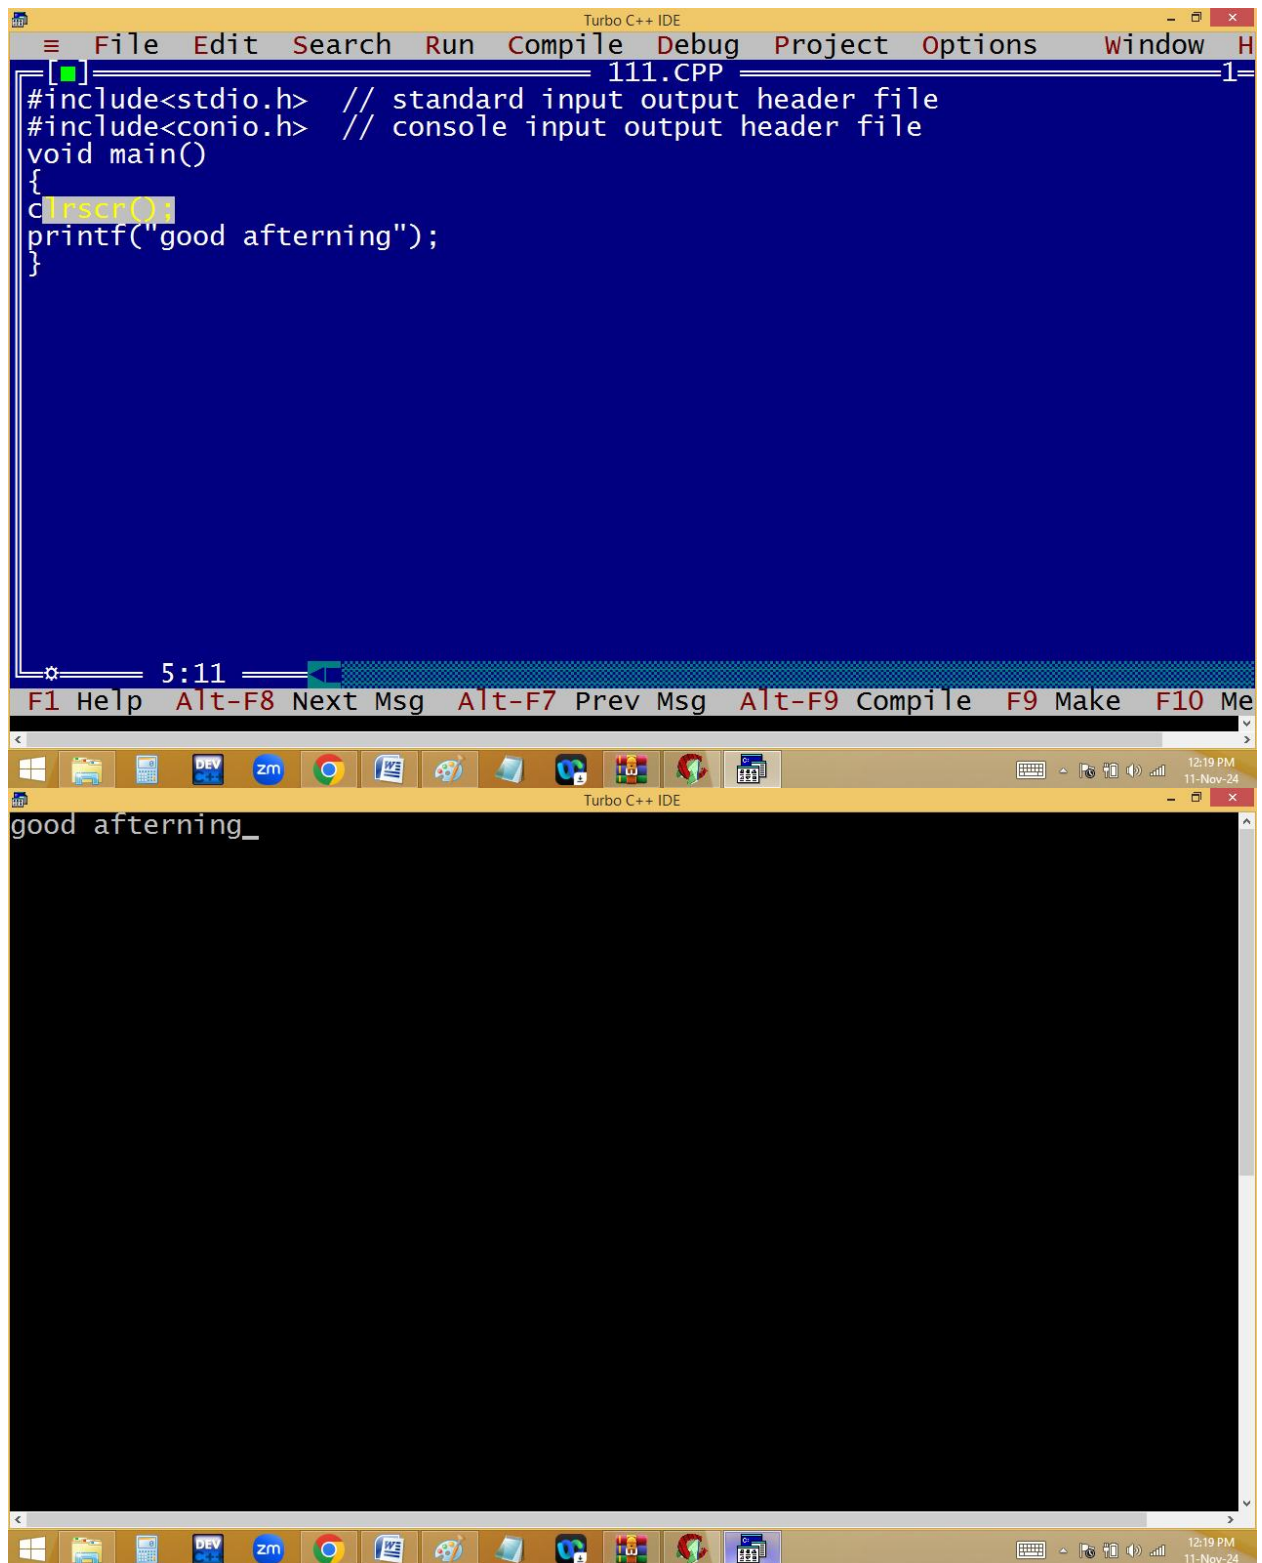

```
File Edit Search Run Compile Debug Project Options Window Help
111.CPP
#include<stdio.h>
void main()
{
printf("Good afternoon");
}
```

Turbo c\c++ IDE for Windows 7\vista by AKKI

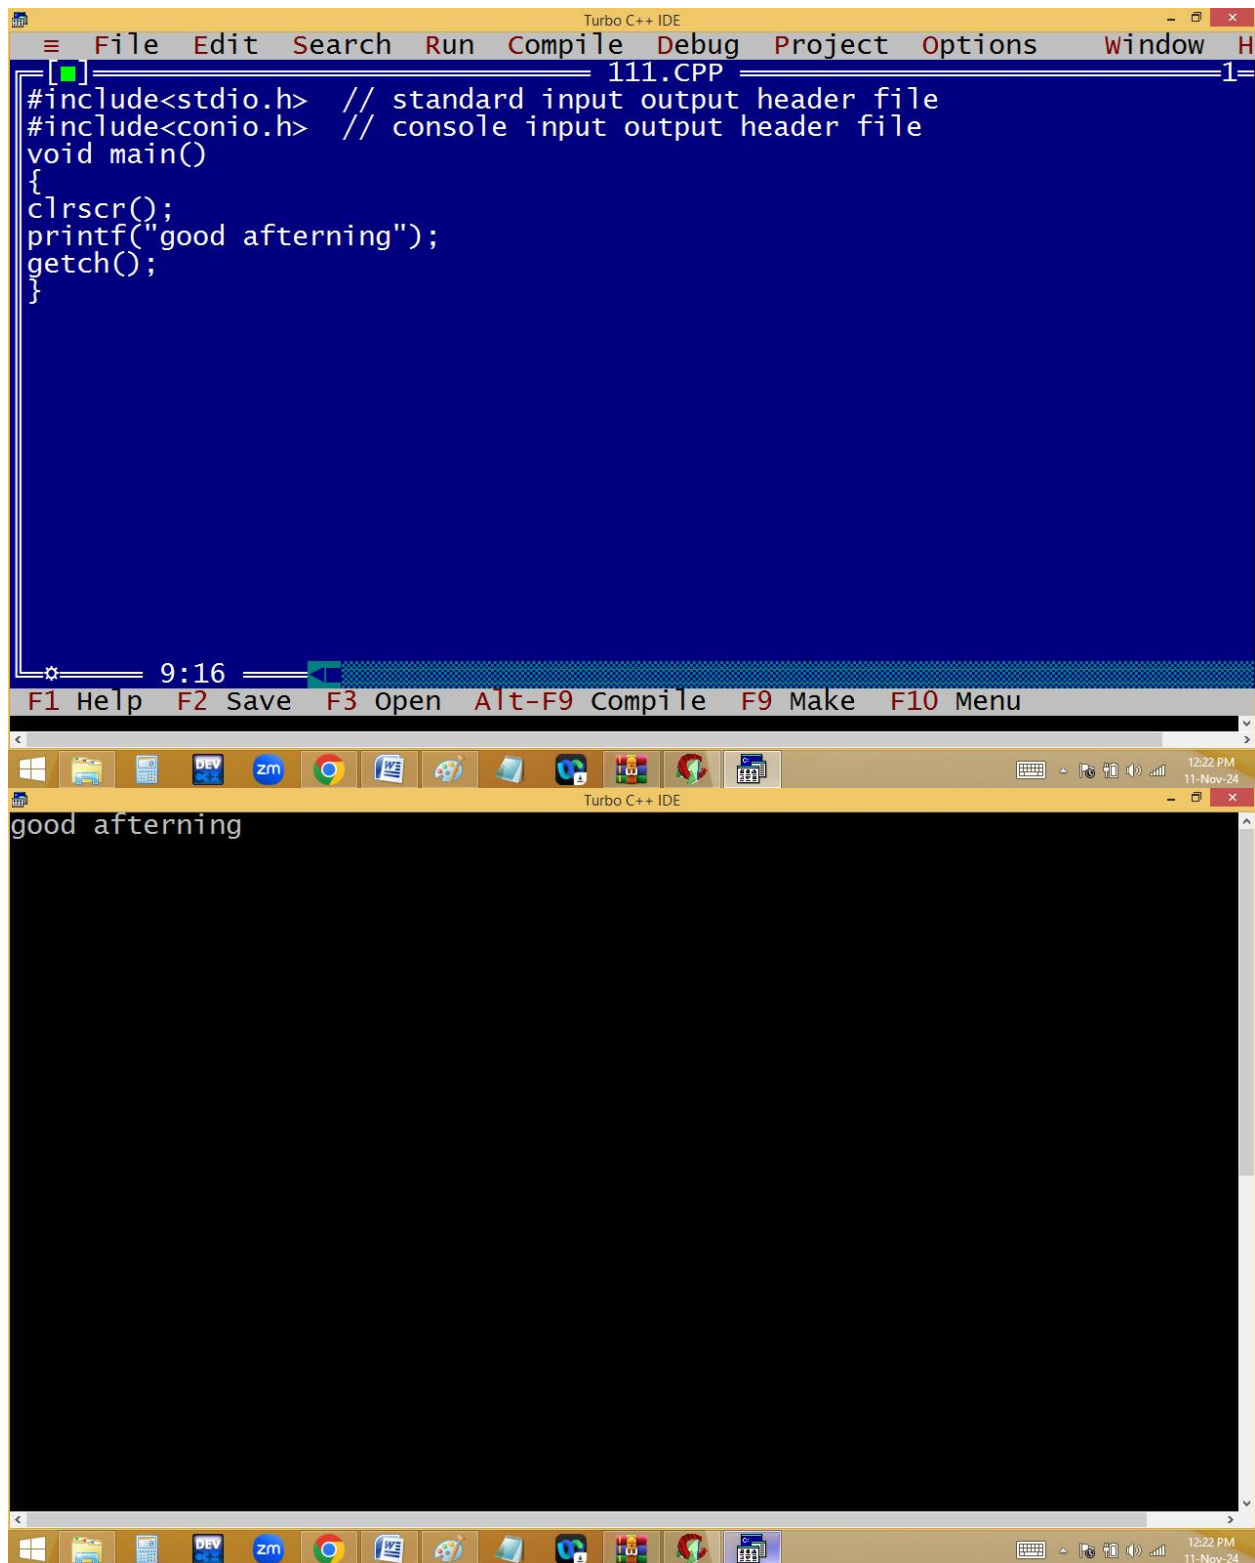

Good morningGood afternoon_

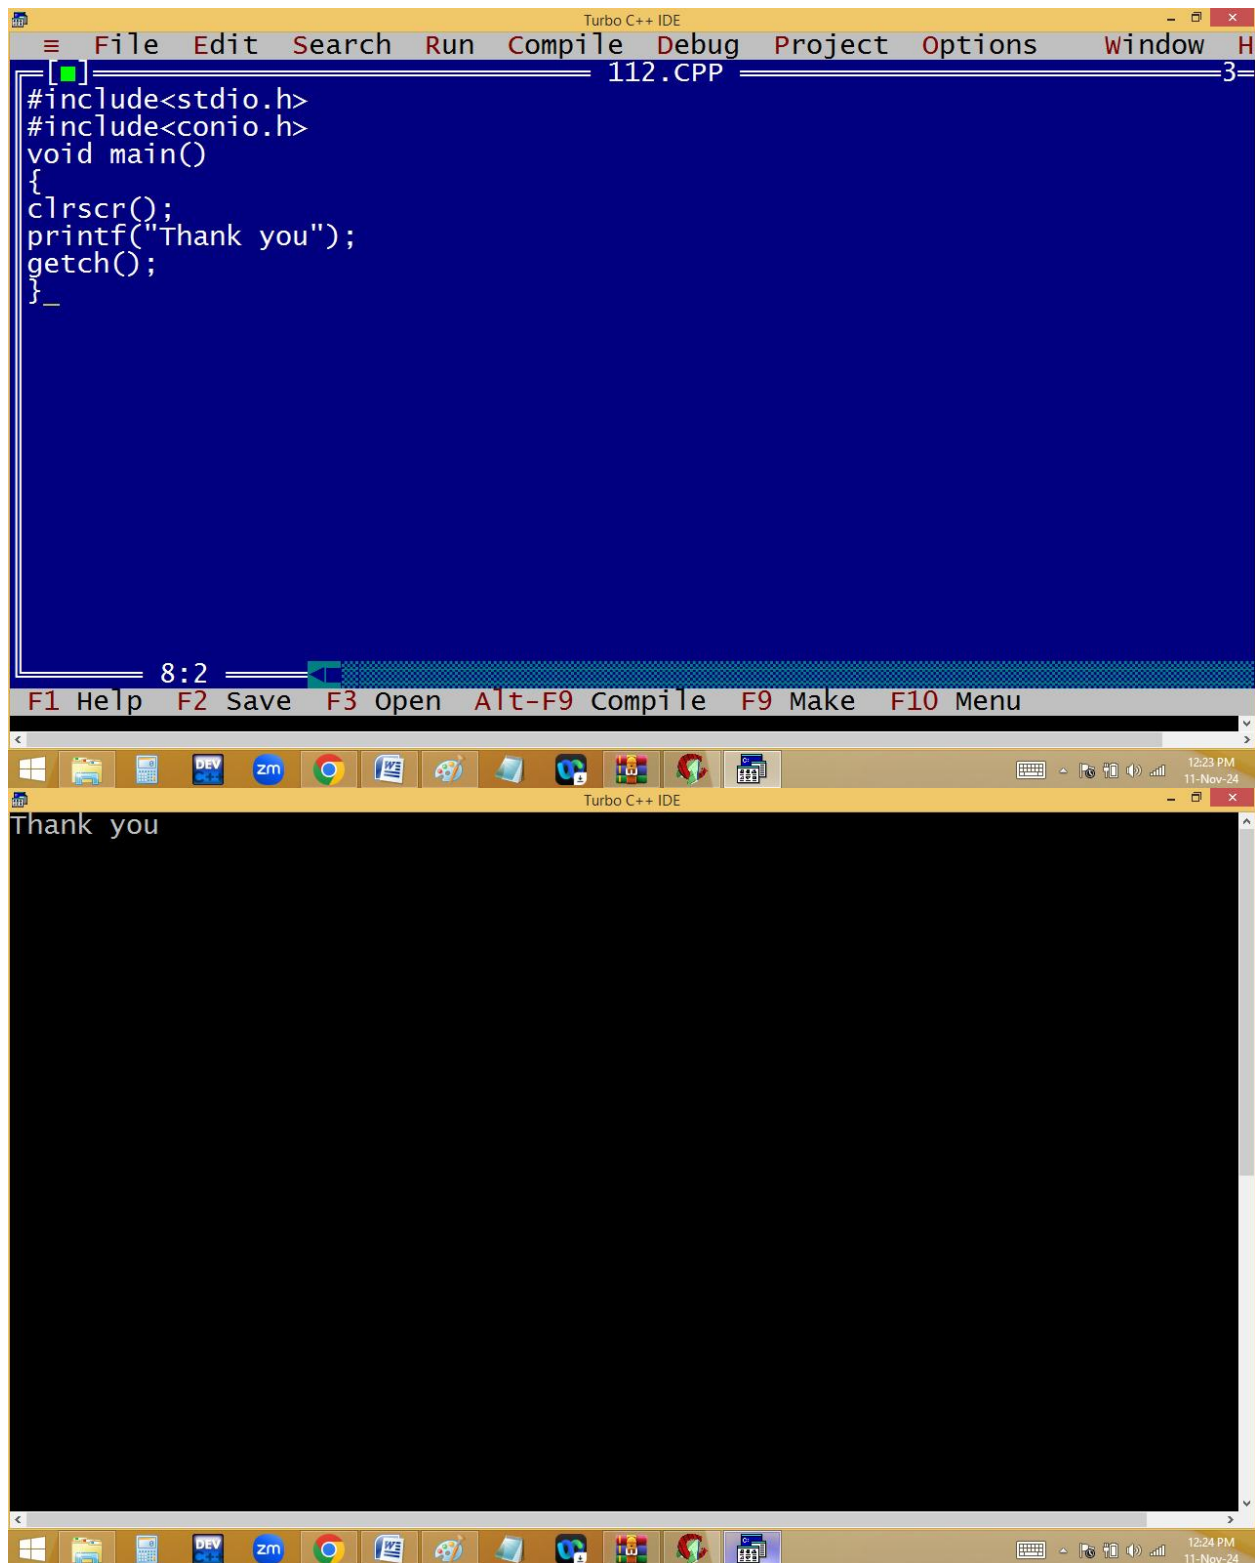

The image shows a screenshot of the Turbo C++ IDE. The top window, titled "111.CPP", contains the following C code:

```
#include<stdio.h> // standard input output header file
#include<conio.h> // console input output header file
void main()
{
    clrscr();
    printf("good afterning");
}
```

The bottom window shows the output of the program, which is "good afterning_". The IDE's menu bar includes File, Edit, Search, Run, Compile, Debug, Project, Options, Window, and Help. The status bar at the bottom displays the time as 12:19 PM on 11-Nov-24.

**To create a new file File menu and select new or alt+f
and new**

To switch between the files press F6

To get full blue screen press F5

To open old files press F3 or Alt+F select open

To close the current file click on green box or alt+f3

To close all the files alt+w [window menu] and select close all

To close the C++ alt+X [Quit]

constants:

Fixed values are called constants. Constant value should be provided at the time of declaration only. i.e. further initializations not allowed.

Numerical constants:

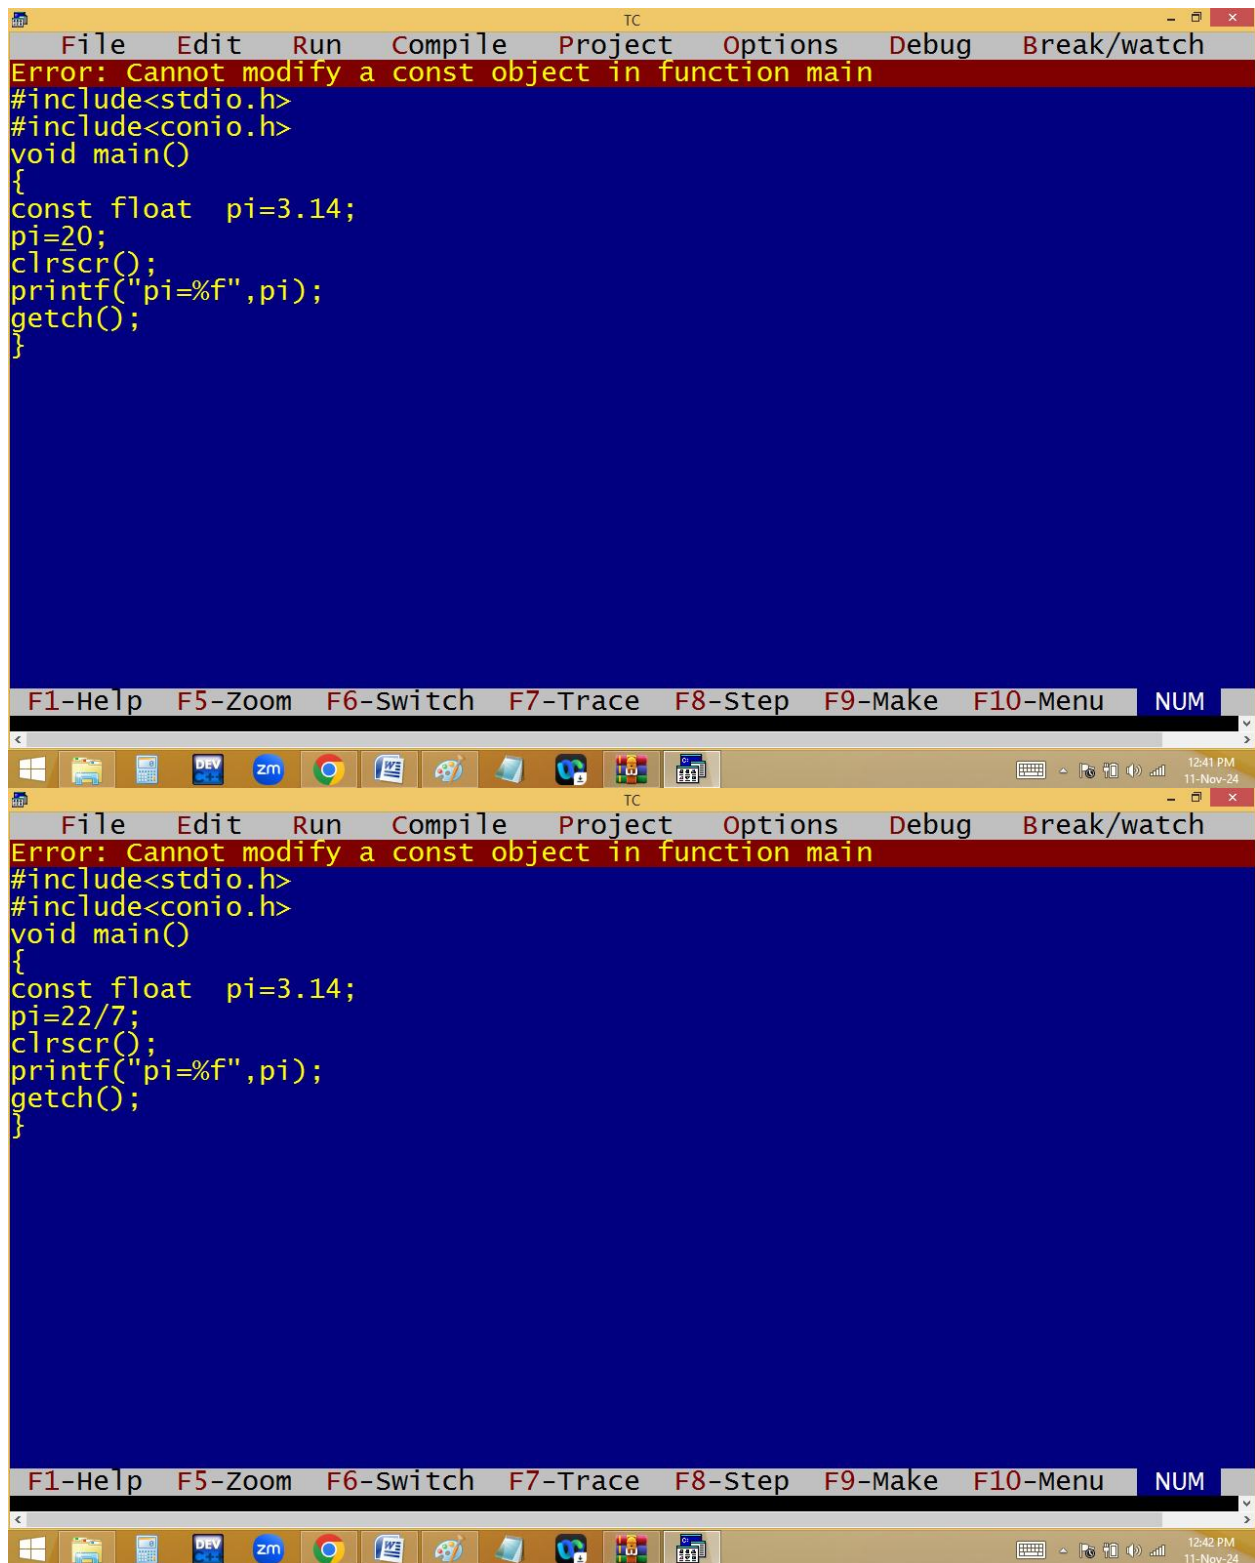

```
const float pi = 3.14;
```

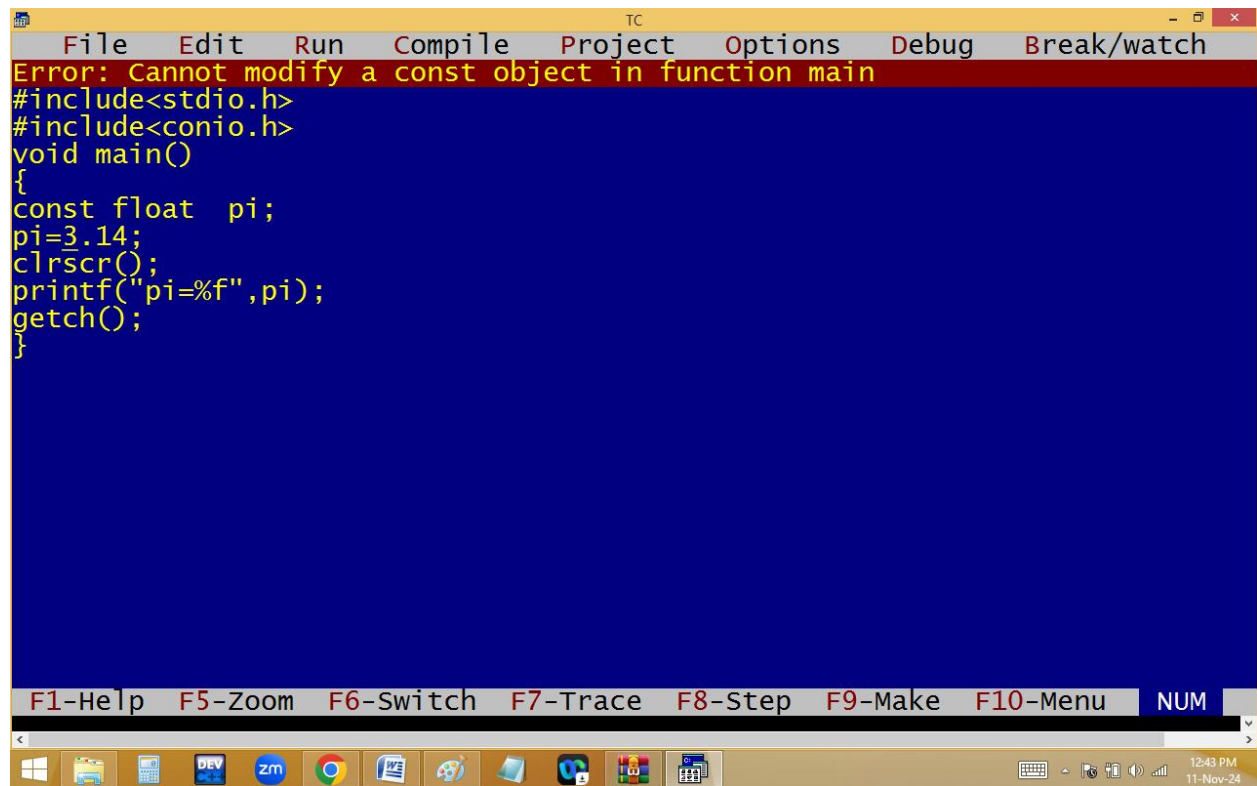

```
const int rollno=1234;
```

Character constants:

```
const char name[ ]="Kishore"; String constant
```

```
const char gender='M'; char constant
```

The image shows a screenshot of the Turbo C++ (TC) IDE. The main window has a dark blue background with yellow text. At the top, there is a menu bar with the following options: File, Edit, Run, Compile, Project, Options, Debug, and Break/watch. Below the menu bar, a red error message is displayed: "Error: Cannot modify a const object in function main". The code being edited is as follows:

```
#include<stdio.h>
#include<conio.h>
void main()
{
const float pi;
pi=3.14;
clrscr();
printf("pi=%f",pi);
getch();
}
```

Below the code editor, there is a status bar with function key shortcuts: F1-Help, F5-Zoom, F6-Switch, F7-Trace, F8-Step, F9-Make, F10-Menu, and NUM. At the bottom of the screen, there is a Windows taskbar with various icons, including the Start button, File Explorer, DEV, zm, Google Chrome, and others. The system clock in the bottom right corner shows 12:43 PM on 11-Nov-24.
